ABOUT ME

Full Stack & Frontend Specialist Developer with over 3 years of experience building scalable web and mobile platforms. Specialized in the React and Next.js ecosystem for creating high-performance interactive interfaces, complemented by Three.js for immersive experiences.

Comprehensive experience across the software lifecycle, from architecture and Backend service integration with Python (FastAPI) via RESTful APIs, to cross-platform development with Flutter & Dart. Skilled in implementing modular components, performance optimization, and containerized deployment with Docker and Nginx.

Focused on applying best practices, separation of concerns, and collaborative work methodologies for resolving production incidents.

PROFESSIONAL EXPERIENCE

Virtual Training Platform Development Intern

TECSUP

January 2022 - February 2022

- E-learning Frontend Development: Designed and implemented interactive modules for the mining sector using HTML5 and JavaScript, achieving full digitization of complex technical material.
- SCORM Standardization & Deployment: Adapted and integrated courses under the SCORM standard for web environments, ensuring traceability across LMS platforms.

Junior Interactive Educational Content Developer

TECSUP

March 2022 - December 2022

- E-learning Development & Publishing (SCORM): Maintained and developed SCORM-compliant web training modules, integrating animations and complex interactions for deployment and traceability on LMS platforms.
- Multimedia & Quality Management: Integrated and optimized multimedia resources (audio, animations, and web interfaces) built with HTML5, ensuring efficient load times and smooth interactions.
- Version Control & Cross-functional Collaboration: Managed version control and continuous integration of educational content via GitLab, collaborating with multidisciplinary teams to ensure high software quality standards.

Frontend Developer — Interactive Educational Platforms

TECSUP

January 2023 - July 2023

- Interactive E-learning Module Development: Built educational components and complex interfaces with JavaScript under the SCORM standard, implementing custom navigation logic and precise audiovisual synchronization.
- Quality Assurance & User Testing: Ran usability testing sessions and code debugging, ensuring web accessibility standards, responsiveness, and smooth interaction across multiple devices.
- Frontend Performance Optimization: Structured interactive dynamics code modularly, reducing load times and ensuring stable performance during multimedia playback on LMS platforms.

React Developer Virtual Labs and 3D Simulators

TECSUP

August 2023 - June 2024

- 3D Virtual Lab Development: Programmed technical and industrial simulations for interactive training using React.js, Three.js, and WebGL, building responsive and intuitive interfaces for exploring complex 3D models.
- Interaction Logic & Multilanguage Support: Implemented 3D environment manipulation logic (camera control, states, and interaction with visual components) and integrated dynamic multilanguage support for global learning environments.
- Quality Assurance & Graphics Performance: Executed functional testing, UI/UX adjustments, and browser rendering performance optimization, ensuring stable frame rates (60 FPS) and a smooth experience across devices.

React Developer & Web Team Lead

TECSUP

July 2024 - July 2025

- Web Development & 3D Simulation Leadership: Led the frontend team in developing interactive platforms and 3D simulators with React.js, coordinating efficient workflows via GitLab and ensuring timely delivery of complex modules.
- UI/UX Optimization & Accessibility: Implemented web accessibility standards, optimized frontend performance, and managed technical documentation, improving usability in real-time incident simulation and assessments.
- Educational Dashboard Architecture: Designed and integrated interactive dashboards for real-time data visualization and user progress tracking.

Full Stack Software Developer

Navia

August 2025 - August 2026

- Full Stack Development & REST APIs: Built web applications and solutions using React.js and Next.js, integrated with Python/FastAPI backend services via REST APIs for efficient data consumption and processing.
- Cross-platform Mobile Development: Implemented features and solutions for web and mobile applications using Flutter and Dart.
- DevOps, Containers & Deployment: Managed Docker containers and carried out web service deployments using Nginx.
- Software Quality & Maintenance: Developed modular, reusable components following best coding practices and separation of concerns; participated in technical analysis, incident resolution, bug fixing, validation testing, and collaborative work via version control.

EDUCATION

Technical Professional in Software Design and Development TECSUP Higher Technological Institute (2020-2022)	Linux Server Administration Course Platzi (2022)	Advanced English for Work Course Platzi (2022)
Professional Git and GitHub Course Platzi (2022)	Modern Development Workflow with CodeStream Course Platzi (2022)	Internet Networking Fundamentals Course Platzi (2022)

AWARDS & RECOGNITIONS

XI Peruvian Symposium on Artificial Intelligence (XI SPIA 2019) Competitor (2019)	Hult Prize at TECSUP Competitor (2020)	XXIV International Systems Engineering Conference (JINIS2017) 1st Place, Technological Innovation Category (2017)
